Software Engineer Position

To whom it may concern,

I am writing this letter to express interest in a Software Engineer role at IMVU.

I am a driven Software Engineer who recently graduated from California Polytechnic State University, San Luis Obispo. Working on complex projects during my time at Cal Poly allowed me to develop a diverse set of skills, pushed me to keep learning and to always ask questions. It has also aided in my ability to communicate effectively in a team environment. My passion for software has led to me expanding my skill set with a variety of side projects from mobile apps in Android to newer web frameworks like React. Recently, I've been developing an Android app that acts as a tool for users to connect with other players of a particular video game. The app uses a cloud data solution in order to store appropriate user information.

Working as an Instructional Assistant at Cal Poly enhanced my ability to communicate effectively and problem solve with individuals working on their own projects. Often times students had trouble structuring their app to meet their expectations. When students struggled, I provided guidance allowing them to create their own successful app. I believe my experience working with students can be applied to streamline interactions between team members resulting in increased productivity.

After looking at IMVU's Android client, I was impressed by their ability to integrate a cross platform game engine into their mobile client. Given my experience in Android development I know I can apply what I've learned to help streamline mobile UI and improve the user experience. I don't pretend to know everything and I expect to hit the ground running, learning best practices from seasoned developers at IMVU.

If you have any questions about my past employment or projects feel free to contact me. I look forward to discussing the position further with you in more detail.

Thank you for this opportunity.

Sincerely,

Griffin Johnson
